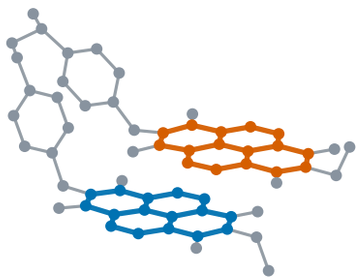
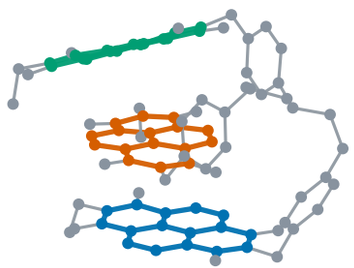
Representative checked oligomer geometries

A NDI dimer: open start → stacked



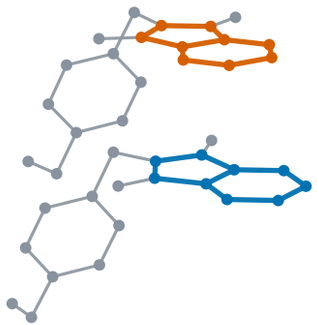
Core normal projection / angle:
3.34 Å / 1.6°

B NDI trimer: two stacked contacts



Core normal projection / angle:
3.28 Å / 2.6°; 3.83 Å / 20.0°

C Two separate phthalimide segments



Core normal projection / angle:
3.38 Å / 2.9°

Actual saved coordinates; H hidden. Colors distinguish redox cores; gray is backbone/caps. Neutral SMD(MeCN) stationary structures; Hessian minima untested.
